## **HOW TO PREPARE YOUR HOME FOR FLEA TREATMENT**

1. All items including toys, pet food and water, and clothing should be picked up off of the floors and carpets/rugs should be thoroughly vacuumed.
2. Upholstered furniture (couches/chairs) should be clear of debris.
3. Items that are stored underneath the beds should be removed and these areas vacuumed.
4. All people and pets will be required to leave and should not return for at least 3 hours. Upon returning we recommend keeping your children off of the floor for 24 hours.

## **AFTER TREATMENT STEPS**

1. Twenty-four hours after treatment vacuum all floor surfaces throughout the house
2. Continue to vacuum every day for 10-14 days
3. If you sense flea activity after two weeks, please call for a follow-up appointment
